**and**  
**Activity Report**

**June 2018**

# BOARD MEETING 27.06.18

Agenda Item: 10.2

Purpose: For Assurance

## CONTENTS

Pages 2-3

### 1. Target Performance: LDP Standards Trajectories and Local Delivery Plan

- a. Current LDP Standards
- b. 2017/18 – Quarter 4 Status Summary 2017/18
- c. Performance Review and Improvement Plans

Pages 4-6  
Pages 7-9  
Pages 10-21

### 2. HOSPITAL ACTIVITY

#### 2.1 INPATIENT AND DAYCASE EPISODES WITHIN WESTERN ISLES

Pages 22-23

Source: TOPAS

Graphs showing:

- i) Total Inpatient/Daycase activity, and
- ii) Inpatient Activity by Elective/ Emergency for
  - a. All Western Isles Hospitals
  - b. Western Isles Hospital only
  - c. Uist & Barra Hospital only
  - d. St Brendan's Hospital only

#### 2.2 INPATIENT AND DAYCASE EPISODES OUTWITH WESTERN ISLES

Page 24

Source: SMR01

Graphs showing:

- i) Total Inpatient/Daycase activity, and
- ii) Inpatient Activity by Elective/Emergency for:  
All Mainland locations

#### 2.3 OCCUPIED BED DAYS AT NHS WESTERN ISLES

Pages 25-26

Source: TOPAS

Graphs showing Total Occupied Bed Days and Average Daily Occupied Beds for:

- a. Western Isles Hospital only
- b. Uist & Barra Hospital only
- c. St Brendan's Hospital only
- d. Daily Percentage Occupancy

#### 2.4 OUTPATIENT ACTIVITY WITHIN WESTERN ISLES

Pages 27-28

Source: Qlikview

Graphs showing Outpatient appointments by:

- i) New/Return
- ii) Return/New Ratio
- iii) Percentage DNA
- iv) Percentage CNW

## BOARD MEETING 27.06.18

### Agenda Item: 10.2

#### Purpose: For Assurance

- v) Percentage cancelled/moved appointments
- vi) Percentage conversion to IP/DC

#### 2.5 **OUTPATIENT ACTIVITY OUTWITH WESTERN ISLES**

Page 29

Source: SMR00

Graphs showing Mainland Outpatient activity by:

- i) New/Return
- ii) Percentage DNA
- iii) Return/New Ratio

#### 2.6 **INPATIENT AND DAYCASE CONTINUOUS INPATIENT STAYS (CIS) WITHIN WESTERN ISLES**

Pages 30-31

Source: ACaDMe

Graphs showing:

- i) Total Inpatient/Daycase CIS activity
- ii) Inpatient CIS by Elective/Emergency for:
  - a. All Western Isles Hospitals
  - b. Western Isles Hospital only
  - c. Uist & Barra Hospital only
  - d. St Brendan's Hospital only

#### **APPENDIX INPATIENTS AND DAYCASES BY SPECIALTY**

Pages 32-33

**Performance & Activity Report: 2017/18 Quarter 4**

**1) Target Performance: Local Delivery Plan (LDP) Trajectories and Local Delivery Plan**

This report contains a review of Western Isles NHS performance status against the current Local Delivery Plan (LDP) standards for 2017/18 (previously HEAT targets/standards). The LDP standards are those targets retained from previous years as ongoing performance measures and reported as part of SG Scotland Performs framework. They are intended to provide assurance on sustaining delivery which will only be achieved by evolving services in line with the 2020 Vision.

The report is based around following three sections:

- a) Current LDP Standards
- b) LDP Key Performance Measures (KPMs) monitoring update for 2017/18 Quarter 4 January to March.
- c) Exception report on KPMs not meeting latest planned trajectory.

**a) Current LDP Standards**

**LDP Standards**

- To increase the proportion of people diagnosed and treated in the first stage of breast, colorectal and lung cancer by 25%.
- At least 80% of pregnant women in each SIMD quintile will have booked for antenatal care by the 12th week of gestation so as to ensure improvements in breast feeding rates and other important health behaviours.
- NHS Boards to operate within their agreed revenue resource limit; operate within their capital resource limit; meet their cash requirement.
- Deliver faster access to mental health services by delivering 18 weeks referral to treatment for specialist Child and Adolescent Mental Health Services (CAMHS) services; and 18 weeks referral to treatment for Psychological Therapies.
- To deliver expected rates of dementia diagnosis, and, all people newly diagnosed with dementia will have a minimum of a year's worth of post-diagnostic support coordinated by a link worker, including the building of a person-centred support plan.
- Eligible patients will commence IVF treatment within 12 months of referral.

## BOARD MEETING 27.06.18

### Agenda Item: 10.2

#### Purpose: For Assurance

- Further reduce healthcare associated infections so that NHS Boards' staphylococcus aureus bacteraemia (including MRSA) cases are 0.24 or less per 1000 acute occupied bed days; and the rate of Clostridium difficile infections in patients aged 15 and over is 0.32 cases or less per 1000 total occupied bed days.
- NHSScotland to deliver universal smoking cessation services to achieve a number of successful quits, at 12 weeks post quit, in the 40% most deprived within board SIMD areas (60% for island health boards).
- 95% of all patients diagnosed with cancer to begin treatment within 31 days of decision to treat, and 95% of those referred urgently with a suspicion of cancer to begin treatment within 62 days of receipt of referral.
- 90% of planned/elective patients to commence treatment within 18 weeks of referral.
- Provide 48 hour access or advance booking to an appropriate member of the GP Practice Team.
- To respond to 75% of Category A calls within 8 minutes across Scotland (Scottish Ambulance Service).
- 98% of patients will wait less than 4 hours from arrival to admission, discharge or transfer for accident and emergency treatment.
- 90% of clients will wait no longer than 3 weeks from referral received to appropriate drug or alcohol treatment that supports their recovery.
- NHS Boards to achieve a sickness absence rate of 4%.
- 95% of all patients referred for first outpatient appointment must wait no longer than 12 weeks from referral (all sources). In addition to this, long waits for outpatient appointments are unacceptable and NHS Boards must also eradicate waits over 16 weeks, which is the longstop.
- 100% of inpatients and daycases are to be seen within the 12 week Treatment Time Guarantee.
- NHS Boards and Alcohol and Drug Partnerships (ADPs) will sustain and embed alcohol brief interventions (ABI) in the three priority settings (primary care, A&E, antenatal). In addition, they will continue to develop delivery of alcohol brief interventions in wider settings.

BOARD MEETING 27.06.18

Agenda Item: 10.2

Purpose: For Assurance

**b) Performance Review and Improvement Plans**

A summary of performance status to date and plans for improvement is provided below for those KPMs which are identified above as not meeting their planned trajectory – highlighted Red in RAG status.

Please note: no new data received for:

Detect Cancer Early.

Standards not meeting target in March 2018:

6a	GP Access – Advance booking with GP
8	All Cancer Treatment – 62 days
10	Number of people on QoF Dementia Register
13	MRSA/MSSA Bacterium
15	Delivery of Alcohol Brief Interventions
16	Smoking Cessation
20	Psychological Therapies Waiting Times
27	Sickness Absence
92a	New Outpatients waiting over 12 weeks
92b	New Outpatients waiting over 16 weeks
98	Early Access to Ante-Natal Services
129	Dementia Post-Diagnostic Support

BOARD MEETING 27.06.18

Agenda Item: 10.2

Purpose: For Assurance

### **LOCAL DELIVERY PLAN STANDARD MEASURES 2017/18 – QUARTER 4**

The LDP Standards are intended to provide assurance on sustaining delivery which will only be achieved by evolving services in line with the 2020 Vision.

*All measures reported to Quarter 4 unless otherwise stated. Some of these figures are local and provisional and may be subject to amendment.*

REF	STANDARD	Associated Key Measures	Latest Period	Latest Status	Comments
6a	<u>Advance booking – GP</u> Percentage of patients, who indicate that they were able to book an appointment with a GP more than 2 days ahead.	<b>Able to book an appointment with a GP more than 48 days in advance or 48-hour access to an appropriate member of the GP Practice Team. Biennial patient satisfaction survey.</b>	Mar-18	R	Standard: 90% <b>Actual: 85.2%</b> Variance: 5.3%
6b	<u>48 Hr Access – GP Practice Team</u> At least 90% of patients respond that they were able to obtain a consultation with a GP or appropriate healthcare professional within 2 working days of initial contact.		Mar-18	G	Standard: 90% <b>Actual: 99.3%</b> Variance: 10.3%
7	<u>Faster access to specialist CaMHS</u> Deliver 18 weeks from referral to treatment for specialist CaMHS services.	<b>90% of patients to be seen within 18 weeks.</b>	Mar-18	G	Standard: 90% <b>Actual: 100%</b> Variance: 11.1%
8	<u>Suspicion-of-cancer referrals (62 days)</u> % of urgent referrals (inc. via A&E) with suspicion of cancer seen within 62 days of treatment starting.	<b>The maximum wait from urgent referral with a suspicion of cancer, to treatment is 62 days; the maximum wait from decision to treat to first treatment for all patients diagnosed with cancer is 31 days.</b>	Mar-18	R	Standard: 95% <b>Actual: 88.9%</b> Variance: 6.4% 16 of 18 seen within 62 days
9	<u>All Cancer Treatment (31 days)</u> % of cancer patients treated within 31 days of diagnosis.		Mar-18	G	Standard: 95% <b>Actual: 100%</b> Variance: 5.3% 14 of 14 seen within 31 days
10	<u>Dementia</u> To deliver expected rates of dementia diagnosis using Eurocode prevalence model.	<b>To maintain Western Isles Dementia QOF Register (50% of estimated number of people with dementia) – target 324.</b>	Mar-18	R	Standard: 324 <b>Actual: 292</b> Variance: 9.9%
11	<u>Financial Performance</u> NHS boards to operate within their agreed revenue resource limit; operate within their capital resource limit; meet their cash requirement.	<b>No trajectories required for this financial performance target as monitored and reported in Monthly Finance returns.</b>	Mar-18	G	Breakeven standard maintained

BOARD MEETING 27.06.18

Agenda Item: 10.2

Purpose: For Assurance

REF	STANDARD	Associated Key Measures	Latest Period	Latest Status	Comments
13	<u>MRSA/MSSA Bacterium</u> To further reduce healthcare associated infections so that staphylococcus aureus bacteraemia (including MRSA) cases are 0.24 or less per 1000 acute occupied bed days.	<b>Boards achieving a rolling rate of 0.24 or less.</b>	Mar-18	R	Standard: 0.24 <b>Actual: 0.25 (Provisional)</b> Variance: 4.2% 7 in 12 months
14	<u>C. Diff infections</u> To further reduce healthcare associated infections so that the rate of Clostridium Difficile in patients aged 15 and over is 0.32 cases or less per 1000 total occupied bed days.	<b>Boards to achieve a rolling rate of 0.32 or less.</b>	Mar-18	G	Standard: 0.32 <b>Actual: 0.14 (Provisional)</b> Variance: 56.3% 4 in 12 months
15	<u>Alcohol Brief Interventions</u> Number of alcohol brief interventions delivered in SIGN settings.	<b>To maintain delivery of 317 ABIs; 80% of which should be in priority settings and 20% in wider settings.</b>	Mar-18	R	Plan: 317 <b>Actual: 391</b> Variance: 23.3% However, only 72% of priority settings target achieved
16	<u>Smoking Cessation</u> Delivery of universal smoking cessation services to achieve a number of successful quits at 12 weeks post quit in the 60% most deprived within-island board SIMD areas.	<b>To achieve 47 successful quits at 12wks post-quit for people residing in the three most deprived local quintiles.</b>	Mar-18	R	Plan: 47 <b>Actual: 36</b> Variance: 23.4% Provisional figures likely to be incomplete
17	<u>Referral to Treatment: Drugs and Alcohol</u> 90% of clients will wait no longer than 3 weeks from referral received to appropriate drug or alcohol treatment that supports their recovery.	<b>The most appropriate treatments, interventions, support and services will be provided at the right time to everyone who will benefit, and wasteful or harmful variation will be eradicated.</b>	Mar-18	G	Standard: 90% <b>Actual: 92.0%</b> Variance: 2.2%
19	<u>18 weeks Referral to Treatment</u> 90% of planned/elective patients are to commence treatment within 18 weeks of referral.	<b>The most appropriate treatments, interventions, support and services will be provided at the right time to everyone who will benefit, and wasteful or harmful variation will be eradicated.</b>	Mar-18	G	Standard: 90% <b>Actual: 91.7%</b> Variance: 1.9%
20	<u>Faster access to Psychological Therapies</u> Deliver 18 weeks referral to treatment for Psychological Therapies.	<b>NHS Boards to achieve a rate of 90%.</b>	Mar-18	R	Standard: 90% <b>Actual: 74%</b> Variance: 17.8%
27	<u>Sickness Absence</u> % Hrs lost due to sickness absence.	<b>NHS Boards to achieve a sickness absence rate of 4%.</b>	Mar-18	R	Standard: 4.0% <b>Actual: 4.5%</b> Variance: 11.8% Hours lost: 6195

BOARD MEETING 27.06.18

Agenda Item: 10.2

Purpose: For Assurance

REF	STANDARD	Associated Key Measures	Latest Period	Latest Status	Comments
55	<u>Emergency Department Waiting Times – 4 hours</u> The percentage of patients seen waiting no more than 4 hours from arrival to admission, discharge or transfer for accident and emergency treatment.	<b>Standard is 95% with stretch target of 98% Based on all new and unplanned attendances at all hospitals in Board.</b>	Mar-18	G	Standard: (95%) 98% <b>Actual: 97.7%</b> Variance against 95%: 2.8%
91	<u>12 week Treatment Time Guarantee for Inpatients</u> The proportion of inpatient and daycases that were seen within the 12 week Treatment Time Guarantee.	<b>100% compliance required.</b>	Mar-18	G	Standard: 100% <b>Actual: 100%</b>
92a	<u>New Outpatients Waiting over 12 weeks</u> The percentage of patients waiting no more than 12 weeks from referral (all sources) to a first outpatient appointment.	<b>95% with stretch 100%.</b>	Mar-18	R	Plan: 95.0% <b>Actual: 88.9%</b> Variance: 6.5% 814 of 916 pts seen within 12 wks <i>Provisional figures</i>
92b	<u>New outpatients Waiting over 16 weeks</u> Percentage of patients waiting no more than 16 weeks from referral (all sources) to a first outpatient appointment.	<b>100% compliance required. Waits over 16 weeks must be eradicated.</b>	Mar-18	R	Plan: 100% <b>Actual: 94.3%</b> Variance: 5.7% 864 of 916 pts seen within 16 wks <i>Provisional figures</i>
97	<u>Detect Cancer Early</u> NHS Scotland is to achieve a 25% increase in the proportion of people diagnosed and treated in the first stage of breast, colorectal and lung cancer by 2014/15. A 25% increase on baseline performance in 2010/11 equates to 29% diagnosed at Stage 1 by 2014/15.	<b>Data based on combined sets of 2 calendar years. Performance Jan 15 - Dec 16 should be at least 29%.</b>	2015-2016	R	Plan: 29% <b>Actual: 15.4%</b> Variance: 46.9% 18 of 117 diagnosed and treated at Stage 1
98	<u>Early Access to Antenatal Services</u> At least 80% of pregnant in each SIMD quintile will have booked for antenatal care by the 12 <sup>th</sup> week of gestation.	<b>Performance is calculated for each of the 5 quintiles and the lowest performing quintile will be reported. Provisional figures reported which are local and subject to change.</b>	Mar-18	R	Plan: 80% <b>Actual: 67%</b> Variance: 16.3% <i>Provisional figures</i>
101	<u>IVF Treatment Waiting Times</u> Eligible patients will commence IVF treatment within 12 months. The target will be based on the proportion of patients who were screened at an IVF centre within 12 months of the decision to treat.	<b>A proportion of WI patients are treated in Glasgow and will be included in waiting times for GG&amp;C.</b>	Mar-18	G	Plan: 90% <b>Actual: 100%</b>
129	<u>Dementia: Post-Diagnostic Support</u> All newly diagnosed with dementia will have a minimum of a year's worth of post-diagnostic support co-ordinated by a link worker, including the building of a person-centered support plan.	<b>Percentage of people newly diagnosed who receive a minimum of one year of post-diagnostic support and who have a person-centered plan in place at the end of that support period.</b>	Mar-18	R	Standard: 100% <b>Actual: 21.74%</b> Variance: 78.3%

<b>1. Performance Narrative (include key reasons for under performance status)</b> Our overall successful quit numbers will not be finalised until the end of June and we expect several more successful quits to be added to the above table. Currently 37 within 60% area.  One of the main factors in our under performance is the way in which we are measured. (SIMD) postcodes are highly inconsistent as a measure within the Western Isles and many of our successful quitters out with the current identified SIMD areas are justified in receiving our specialist support. The number of successful 3 month quits overall in this time period in all SIMD areas is 64.  Additional factors include: The increased number of smokers that are using E-cigarettes Referral rates lower than in previous years New staff member Staff illness Poor Pharmacy support to public																			
<b>2. Planned Performance Improvements:</b> <table border="1"> <tr> <td>1. Sep-17	95	90.0	5.6%																		
Dec-17	94	90.0	4.4%																		
Mar-18	74	90.0	-17.8%																		
<b>1. Performance Narrative (include key reasons for under performance status)</b> Percentage of patients seen within 18 weeks is lower for a number of reasons.  Western Isles has a low referral rate by comparison with national average of 5.8 per thousand and increasing this is a desirable outcome. Referral rates have slightly increased (from 1.4/1000 to 1.7/1000) with awareness amongst GPs and MH colleagues of psychological interventions and availability. However capacity has not increased in line with increased demand. National guidance suggests 1 psychological therapist for high intensity per 6000 population. Current workforce for the Western Isles is 1.5wte. Lewis/Harris CBT Waiting list has been increasing over the past 6 months, which is starting to have an impact on allocating within 18 weeks.  There are patients on the waiting list in Uist & Barra who were referred either just before or not long after local part time CBT therapist retired – the new CPN in post is not trained to deliver CBT. Therefore there is reduced PT service available in U & B at present, but monthly clinical psychology clinic now onstream.  The DNA rate for first appointments with CBT therapist is higher than for return appointments (sitting at 30% in Q4). This reduces capacity to take on new referrals.  Staff trained in psychological therapies over last 12 months are not taking on additional PT referrals and some of that work is not included for target (eg CPNs). However, there should still be improvements in service provision for MH patients.  There are a few issues that may be impacting the data quality. However, local Data Analyst has been working hard over the past 6 months to identify these and tried to work around them. For example extracting an accurate waiting list has taken some time, as has system functionality. Data analyst now sending out a monthly list of both patients waiting and patients seen by clinician with the intention of verifying the return. Staff have managed their waiting list differently, some using the ticket system, some using the RMS postbag & CAMHS PT is integrated into their generic. Work is ongoing to increase consistency and a system has been developed to integrate all of this. A MHAIST project will improve this further to standardise management of caseloads and waiting lists.  Additionally some work was done with Medical Records to backdate appointment outcomes which will																					

BOARD MEETING 27.06.18

Agenda Item: 10.2

Purpose: For Assurance

improve the data quality.	
<b>2. Planned Performance Improvements:</b>	
1. Introduction of cCBT for mild anxiety and depression	
2. Increased efficiency re use of clinic spaces and bookings.	
3. Exploring other ways of increasing capacity e.g. other forms of cCBT pending MH Redesign Workforce changes which are ongoing.	
4. Reviewing first appointment DNA rates and looking at solutions to reduce current figures of 30%.

<b>1. Performance Narrative (include key reasons for under performance status)</b> Our main problem is the coding done by mainland units of women who have travelled there to deliver as they are coding the date of booking as date of being first seen at that unit which is usually in the 2 <sup>nd</sup> or 3 <sup>rd</sup> trimester of pregnancy ,beyond 12 weeks. We therefore have to work in retrospect with local staff to correct the data submitted by other units. As you can see in the supporting analysis significant improvements to the data result once corrected and bring our figures beyond and up to the national target. The reporting is always done on the lowest performing quintile in our area and this is usually Uist or Barra where most of the women deliver on the mainland.																																											
<b>2. Planned Performance Improvements:</b> <table><tr><td>1. Continue to support encourage women to book prior to 10 weeks gestation. (This message is delivered nationally and appears to be well published and documented, it does not seem to be the main problem for us at W.I.)</td></tr><tr><td>2. Strive to implement an electronic maternity system that will give us more accurate information, this will help with quicker resolution to incorrect data entry by mainland boards, but as coding is done at time of delivery in unit of delivery we will still get incorrect data for W.I.</td></tr><tr><td>3. Uist and Barra staff know to document in referral letters when the women book so that the information is available to mainland units on all correspondence.</td></tr></table>								1.
