- There are no legal, financial or other constraints associated with the report.

2 Report summary

2.1 Situation

The Integrated Joint Board is required to report on the National Integration Indicators to Scottish Government via the Ministerial Strategic Group (MSG) for Health and Community Care. These are intended to provide a view of how Partnerships are progressing against a range of whole system level measures. Early notice has been given that Scottish Government are reviewing the indicators and that they are likely to change.

2.2 Background

Currently there are six MSG indicators:

1. Emergency admissions
2. Unscheduled hospital bed days
3. A&E performance
4. Delayed discharges
5. End of life care
6. The balance of care across institutional and community services

A description of the data which relates to the indicators is included within this appendix 1 of this report.

Currently the Integrated Joint Board receives a performance report which provides data on 5 of the 6 indicators as data on indicator 6 is under development nationally.

2.3 Assessment

The report provides both a status report for month of February 2023 and importantly additional trend analysis for each of the indicators over the period January 2018-2023.

The trend analysis graphics provide an indication of performance trends in each of the domains.

In addition to the run charts there is a secondary chart which benchmarks local performance alongside that of Highland Partnership. The rationale for this is that it represents a remote and rural population. However direct comparison should be treated with caution given the unique characteristics of the population of the Western Isles.

Overall, the indicators provide a broad if somewhat limited indicator of the overall health of the population of the Western Isles.

2.3.1 Quality/ Patient Care

The report has no direct impact on quality of care (and services).

2.3.2 Workforce

No direct impact on the workforce including resources, staff health and wellbeing.

2.3.3 Financial

No financial impact
